I am Refilwe - I am a puzzle-solver, by nature, I love collecting information and using it towards something.

I am a hard worker, self-driven, motivated individual who thrives for academic excellence and I love solving problems especially coding challenges or coming up with algorithms to already existing solutions. I spend most of my time reading books or learning from coding tutorials, my current focus in learning is website development. I believe I am a creative individual, as I also do a lot of graphic-work in my spare time. I think my greatest gift in life is that I am a learner and I learn fast.

I aim to make an impact in my community, and during school holidays I do career awareness presentations to high school students in my community through a non-profit organization I joined. My biggest aspiration in life is to contribute towards shaping women, directly or indirectly by potentially being one of the examples that women can as well flood the STEM careers and do well at them.
